Waiter | So Far So Good | Lynbrook, NY

- Highly organized and personable server with experience providing exceptional customer service.

EDUCATION

CUNY Queensborough Community College

Associate Degree in Computer Science -- Graduate in May 2024

PROJECT

EchoReads - An Article sharing web app with advanced features and RESTful API designed & developed entirely by myself.

<https://echoreads.vercel.app/>

- Developed a web app using React, Node.js, Express, and PostgreSQL, featuring a responsive and accessible design with Bootstrap, CSS, and SCSS.
- Implemented secure authentication with email/password, Google OAuth, and Google reCAPTCHA v3, alongside HTTPS and cookie management.
- Crafted a secure RESTful API with advanced validation to prevent unauthorized access and SQL injections, supporting complex query parameters for customized content.
- Enabled user features like creating, editing, deleting posts, endorsing and commenting others' posts, and managing images through GCP cloud storage. Posts include categories and tags managed via a structured database.
- Optimized performance using React hooks and modern backend coding strategies, with a user-friendly profile management system.
- Integrated a backend-powered search functionality for posts.
- Utilize SMTP to automatically dispatch verification codes and subscription confirmation emails to users.
